

Meet Jacksonville Speech & Hearing Center

Mission

Our mission is to provide the highest quality professional and compassionate care to all individuals with speech, hearing and/or language disorders in our community.

Since 1949, we have provided professional, compassionate care to thousands of children and adults giving them the necessary communication tools to live a more fulfilling and productive life.

While our patients come from all walks of life, Jacksonville Speech & Hearing Center has a special mission to ensure no one is turned away from receiving the hearing, speech or language help they need due to finances. By choosing our clinic to receive your hearing, speech and language services and hearing aids, you will be helping us complete this mission as well.

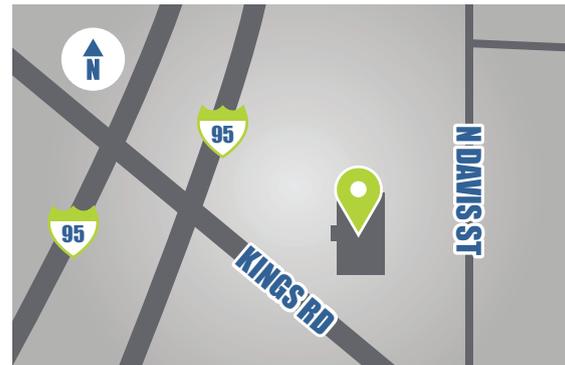

Entrusting us with your hearing healthcare treatment is an investment in your community.

Health Insurance and Payment

We work with most HMO and PPO insurance plans along with Medicare and Medicaid. Payments can be made in the form of cash, check, VISA, American Express, MasterCard and Discover.

Financial Assistance

We are committed to providing the highest quality care to ALL individuals with hearing, speech and/or language disorders in our community – including patients that otherwise cannot afford them. We advocate for the needs of our patients by seeking assistance from other charitable organizations and offering payment options.

Providing a world of communication to all.

Along with having a community focus, we also differ in that we offer:

Only Audiologists and Speech Pathologists

We are staffed with professionally licensed and certified doctors of audiology and speech language pathologists. Together, we have decades of experience in providing exceptional hearing, speech and language healthcare.

Patient-centric Care

Jacksonville Speech & Hearing Center is here to serve you and provide the most appropriate treatment plan for improved communication. Everything we do is to further our mission of helping you communicate better and bring more enjoyment to your lives.

An Individualized Approach

We take into account your healthcare needs, lifestyle, and economic situation before recommending the treatment plan that is right for you and your loved ones.

Founded in 1949, Jacksonville Speech & Hearing Center was one of the first speech and hearing centers to serve children in Northeast Florida and is currently the only non-profit organization that offers audiology and speech services to children and adults.

Speech and Language Pathology

At Jacksonville Speech & Hearing Center, we provide services to help individuals of all ages develop better speech and language skills and to educate their loved ones on how to promote speech, language and listening skills in the home.

We provide diagnostic evaluations and treatment of speech and language problems including:

- Autism spectrum disorder
- Oral motor speech disorder
- Receptive and expressive language disorder
- Voice disorders
- Stuttering/disfluency
- Apraxia
- Processing
- Literary/dyslexia
- Articulation/phonological disorders

How do I know if I or a loved one has a speech or language disorder?

You don't. That's why we're here. If you suspect or have noticed any of the following signs, come in for an evaluation:

- Difficulty producing speech sounds correctly
- Trouble producing speech sounds fluently
- Issues with own voice resonance
- Trouble understanding others
- Difficulty sharing thoughts, ideas, or feelings in spoken or written format

Audiology Services

At Jacksonville Speech & Hearing Center, we are proud to offer a variety of audiology services including:

- Pediatric and adult diagnostics
- Hearing aid prescribing, fitting, and adjusting
- Auditory Processing Disorders
- Tympanometry and Acoustic Reflex
- Otoacoustic Emission (OAE)
- Tinnitus Treatment
- OSHA compliant industrial screenings
- Earmolds for hunting, recreational shooting, swimming, musicians, and hearing aids

Parent Education Program

At Jacksonville Speech & Hearing Center, we not only want to treat the patient, but the whole family and that is why we offer group or individual education consultations.

Hearing Aids

Jacksonville Speech & Hearing Center offers a large selection of hearing aids from a variety of manufacturers. As there are many styles of hearing aids, our doctors will help you find the best choice for your lifestyle and hearing loss.

Styles of Hearing Aids

Hearing aids are available in many different sizes and styles. Thanks to advancements in digital technology and miniaturization of the internal components, many of today's hearing aids are considered sleek, compact, and innovative. They offer solutions to treat a wide range of hearing and communication needs.

Hearing Aid Technology

There have been huge strides in the technology in hearing aids. Bluetooth® connectivity in hearing aids makes it possible to stay connected to a number of electronic devices, greatly elevating the hearing aid wearing experience. Directional microphones amplify the sound in front of a listener, which can combat challenging, noisy environments. Advanced feedback management and wind reduction systems provide increased listener comfort indoors or out.

What happens when hearing and speech problems go undiagnosed or untreated?

In children, hearing and speech/language disorders cause problems at school by impacting the child's ability to learn. Poor self-esteem and behavior problems can lead to a lifetime of isolation. As adults, untreated communication disorders make it difficult to retain employment, enjoy gathering with friends and family, as well as contribute to depression and affect your brain processing.

Treating Hearing Loss Matters

It's no secret that our bodies are systemic. Every system works and effects another system. In recent years, considerable information has emerged on the link between hearing and just about every aspect of a person's life. It has been linked to cognitive decline, Alzheimer's disease, increased risk of falling, increased hospitalizations, diabetes, heart disease, kidney disease, cancer treatments, depression, and speech and language disorders. Early detection and treatment shows a reduction in the occurrences of many of these other health-related concerns.

It's never too early or too late to take steps to address a speech, language or hearing concern.
